

▼ Service Projects & Quote Requests

Here you can find forms to fill with all the necessary details needed for aliquot, custom plates or screening project requests.

Request for plates -> you get only plates

If you wish HTB to perform screening, choose option with screening.

Please note: **Delivery time is 2-4 weeks, depending on complexity of the order.**

Aliquots are given every week, orders should be in by Monday 15:00, pick up Wednesday morning.

Category	Request name	Short description
Clinical DSRT - regular or Flow	Clinical DSRT - regular or Flow	This request is used for clinical sample submission, to be screened and analysed by HTB.
Consumables, equipment, data analysis	Compound aliquots	Use this request to order aliquots from HTB bulk compound collections.
	Consumables - plates and reagents	Use this request to order consumables (plates or reagents) from HTB.
	Data analysis	Here you can request for data analysis performed by HTB personnel.
	Equipment use	Use this request to let HTB know you will be using the devices as stand-alone or assisted.
Custom compound plates	1_Re-order plates	Order more plates designed and made previously.
	2_Single compound custom plates	Custom compound plates with oncology collection, or your own compounds.
	3_Combination plates	Custom combination plates (matrix or DECREASE).
	4_Compound collection plates	Assay ready plates with pre-plated compounds from HTB commercial library collections.
DSRT - standard sets	Standard DSRT sets - on Corning plates	Standard DSRT sets on Corning 384 plates (#3764 black or #3765 white).
	Standard DSRT sets - on other plates	Standard DSRT sets on any 384 plate type.
DSRT - standard sets with screening	Standard DSRT with screening - on Corning plates	Standard DSRT plates with screening done by HTB on Corning 384 plates (#3764 black or #3765 white).
	Standard DSRT with screening - on other plates	Standard DSRT plates with screening done by HTB on any type of 384 plates.
Flow cytometry - plates and screening	Flow plates with and without screening	Compound plates for flow cytometry readout with or without screening and analysis.
Screening Projects	Screening project with HTB compounds	Customized screening project with compounds or RNAi.

- ▶ [Clinical DSRT - regular or Flow \(1\)](#)
- ▶ [Consumables, equipment, data analysis \(4\)](#)
- ▶ [Custom compound plates \(4\)](#)
- ▶ [DSRT - standard sets \(2\)](#)
- ▶ [DSRT - standard sets with screening \(2\)](#)
- ▶ [Flow cytometry - plates and screening \(1\)](#)
- ▶ [Screening Projects \(1\)](#)

Which request to choose? Most common cases:

- aliquots -> Consumables, equipment, data analysis -> Compound aliquots
- DSRT sets (e.g. FO5A) -> **DSRT – standard sets**
 - > **Standard DSRT sets - on Corning plates** or
 - > **Standard DSRT sets - on other plates** (e.g. Corning 3830)
- DSRT sets with screening (HTB will seed cells for you and run readout and analysis)
 - > **DSRT - standard sets with screening**
 - > **Standard DSRT with screening - on Corning plates** or
 - > **Standard DSRT with screening - on other plates**
- Custom plates:
 - you want some oncology compounds (e.g. FO5) or some other compounds picked for you on a separate plate with several doses
 - > **Custom compound plates -> 2_Single compound custom plates**
 - you want combinations on your plate
 - > **Custom compound plates -> 3_Combination plates**
 - you want more copies of plates made for you already
 - > **Custom compound plates -> 1_Re-order plates**
- Any requests with **screening** performed by HTB (other than standard DSRT sets)
 - > **Screening Projects -> Screening project with HTB compounds**
