

## EXCHANGE STUDENT INFORMATION SHEET

Summer 2021 (updated on 22.9.2020)

Name of Institution	University of Helsinki
Erasmus ID Code	SF HELSINK01
<b>FACULTY OF VETERINARY MEDICINE</b>	
Address	P.O. Box 66, 00014 – University of Helsinki, Finland visiting address: Agnes Sjöbergin katu 2
Telephone	Mobile: +358 50 415 0601 / +358 2941 22410
E-mail address	studentexchange@helsinki.fi
<a href="#">Web address</a>	

### Clinical practice for visiting students, summer 2021

**Small animal hospital** (including surgery, internal medicine and polyclinics rotations and after hours on-call duty): for Finnish speaking students only  
- **12-14 places** within the period of 31.5. – 15.8.2021 (start dates only **31.5. and 14.6.2021**)

**Equine hospital:** for Finnish and English speaking students (*no formal teaching for the English speaking students*)

- **8 places** within a period of 31.5.-25.7.2021 (starting dates **31.5.2021 in Finnish only and 14.6.2021 in Finnish and English**, for Finnish-speaking students possible to start already in Mid-May if needed)

Weeks in Small animal hospital and Equine hospital can also be combined. Students can do a part of the traineeship in one clinic and a part in another one.

**Production animal hospital and ambulatory clinic** in Mäntsälä, for Finnish speaking students only

- **2 places** for a period of 31.5. – 1.8.2021

- **2 places** for a period of 14.6. – 15.8.2021

**All numbers depend on the amount of Helsinki university students in the summer; final numbers are available by the end of February 2021.**

**In total: 24-26 places**

**Study credits:** 1 week of clinical rotations equals to 1,5 ECTS.

**N.B.** Summer practice does not include formal teaching such as demonstrations or discussions. Also some special clinics do not operate during summer time.

### [Application information for visiting students](#) and prerequisites

**Deadline for applications** for the summer 2021 is **February 15<sup>th</sup>, 2021**.

Decisions for summer places will be made by the end of February 2021.

**[Proof of language skills](#)** is required from visiting students coming to study in the Faculty, unless they are native Finnish speakers. Students can use an official international English language test, such as TOEFL, or download University of Helsinki's Language Certificate: The form should be filled out by the English teacher at the home university. Students must have at least **B2 level** English language skills on the CEFR scale of the European Language Portfolio.

**Prerequisites in clinical practice:** Students applying for clinical practice need to be at least at their fourth year of veterinary education and have passed the preclinical and clinic preparation courses. In case the student has not yet passed some of the clinical theory courses by the time of application deadline but will have by the time she/he starts studies in Helsinki, she/he has to include a list of those courses in the application. **Students should also mention their previous and forthcoming clinical practice experience in the application.**

### **General information for exchange students**

[The Exchange student instructions](#) are the starting point for making all arrangements for such essentials as health insurance, housing, student benefits, arrival, other practicalities and settling in from a new student's perspective.

#### **The equipment to be brought to the clinics:**

For the Small Animal Hospital: stethoscope, thermometer, pen and small notebook (for taking notes), permanent marker pen, indoor shoes, scissors, pocket calculator, and a nurses (fob) watch that has a second hand. If the student participates in a diagnostic imaging rotation, also a ruler.

For the Equine Hospital: same equipment as above + trainers or rubber boots; preferably something that have reinforced toes (you may be able to borrow a pair from the Equine Hospital – the sizes are limited).

For the Production Animal Hospital (Saari): For short periods: Rubber boots and overcoats are offered from Saari. Longer stays: exchange student brings own, new rubber boots, bought in Finland; preferably something that have reinforced toes and are suitable for working in farms. You will get the overcoats from Saari.

#### **Health insurance**

Exchange students should bring European Health Insurance Card (EHIC) with them. The card entitles students to the same healthcare services as the local population in case of an emergency. However, healthcare in Finland is not totally free of charge.

Faculty has taken an **accident insurance** for its undergraduate and postgraduate exchange students. This insurance covers treatment expenses (max. 8 000 euros) and costs of permanent handicap (max. 10 000 euros) caused by possible accident in the Veterinary Teaching Hospital. Exchange students are also insured by the University of Helsinki in above mentioned cases, if they are injured because of the negligence of the University and also for the unintentional negligence of students causing damage to the University's property (including clients' animals). It is advisable for students themselves to take an insurance that covers free time, travel, and legal protection.

**Vaccinations:** All students attending clinical work are recommended to have two shots of MMR (measles, mumps, rubella) and a dT shot (tetanus-diphtheria) every ten years before arriving to Finland. We recommend that exchange students take rabies vaccination (three shots) if attending the work at the clinics, although Finland has a very low risk of rabies. The risk of rabies exists when working with bats or rescue dogs of certain high-risk countries.
